**BSC  
4933/6932**

## **Sustainability of Natural Resources**

Offered in Fall 2024  
Tue & Thu 2:00–3:15 pm

---

### **Interested in Sustainability and Climate Change?**

We will explore the wide range of renewable natural resources as the cornerstone for supporting a sustainable future: food crops, forestry, oceans, water, biomass, and algae. We will cover global challenges in energy, water, and food security and their interconnections through a systems thinking approach.
