

Major Fact Sheet

Physical Sciences, BA

What will I be studying?

Physical Sciences is an interdisciplinary major consisting of coursework in physics, chemistry, geosciences, and math. The BA program prepares students for work in technical fields requiring a background in one or more of the physical sciences. It has less required major coursework, and so, allows for more freedom to take electives outside the physical sciences.

Career Ideas!

Engineering Connected

Use math and science to solve different technical problems; develop new products for companies or individuals.

Research and Technical

Operate laboratory tools and equipment; process data for experiments, analyze experiment results, record observations, and create reports for further examination.

Educator/Teacher (Secondary)

Teach courses pertaining to the laws of matter and energy; includes both teachers primarily engaged in teaching..
