## 6. Faculty to student ratio in professional studies courses:

*Definition: Professional studies courses are those with architectural content required of all students in the NAAB-accredited program and are the core of a professional degree program that leads to licensure. Knowledge from these courses is used to satisfy Condition 3-Program and Student Criteria.*

*Faculty-to-student ratios are calculated as the total number of full-time-equivalent faculty teaching the total number of full-time-equivalent students enrolled in the program (for program faculty to student ratio) or in the classes (such as professional courses).*

*The ratio for professional studies courses should include all courses in the program, including studio courses. The ratio for studio courses is a sub-set of professional studies courses.*

*The ratio is 1 (faculty): X (number of students). Enter only the number of students. If the ratio is 1 faculty member to 21 students, enter 21.*

## 2. Graduation rate by track

*Definitions: Advertised program length is the amount of time necessary for a student to complete all requirements for a degree or certificate, according to the institution s catalog.*

***The graduation rate should be calculated separately for each trackif tracks have different advertised program lengths.** Programs should work backward from the reporting year to identify the entering semester of the cohort graduating at 150% of the advertised program length at the end of the reporting year. For this same cohort, the graduation rate should also be calculated for students who graduated in 100% of the advertised program length. Programs should not report graduation rate data until a cohort has reached 150% of the advertised program length. At that time, the program will report the graduation rate for students from the entering cohort who graduated in 100% and 150% of the advertised program length.*

*For example, in a two-year track, students graduating in 100% of program length would have graduated in two years and students graduating in 150% of advertised program length would have graduated in three years. Therefore, subtract three years from the reporting year to find the entering cohort for the graduation rate question.*

*To calculate 150% of program length, multiply the advertised program length by 1.5. If this results in a decimal, round up. For example, students graduating in 150% of the advertised program length for a five-year program would graduate within eight years (5 X 1.5 = 7.5, round to 8 years).*

*Example: Fifty (50) students entered a two-year program in fall 2021 (2021-2022 academic year). 25 (50%) of those students graduated in two years, in 2024 (100% of program length). An additional 15 students graduated in 2025 (150% of program length), bringing the graduation rate to 80%.*
