

FREE VIRTUAL WORKSHOP SERIES

Project Quality Management in Evaluation

Saturday, March 1, 2025 // 8:00–9:00 a.m. ET

Presented by:

Pallavi Nayar, M.S. Chemistry

pallavinayar@usf.edu

Project Quality Management (PQM) ensures that a project meets stakeholder expectations and industry standards through effective planning, assurance, and control processes. This presentation will explore the key components of PQM, including quality planning, quality assurance, and quality control, highlighting their role in minimizing defects and optimizing project outcomes.
