CANVAS PEER REVIEW
Setting up a Peer Review Assignment

Peer review assignments provide students with the opportunity to give feedback on each other's work. With a Canvas peer review assignment, student names may be displayed to each other, or you may opt to make the peer review process anonymous. You can also opt to provide students with a rubric they can use to grade and provide feedback on each other's work.

SETTINGS

**1** When creating the assignment, check the box next to **Require Peer Reviews**.

Peer Reviews

☐ Require Peer Reviews

2 When creating the assignment, check the box next to "Require Peer Reviews".
- Manually Assign Peer Reviews - requires you to manually assign students to review other students' work.
- Automatically Assign Peer Reviews - Canvas will randomly assign students to review as many peers as you specify.

How to Assign Peer Reviews

◉ Manually Assign Peer Reviews

◯ Automatically Assign Peer Reviews

DON'T MISS

If the option to Automatically Assign Peer Reviews is selected, the peer reviewers will be generated once the submission/assignment due date has passed. If you would like peer review to occur later, you can specify this date in the "Assign Reviews" field.
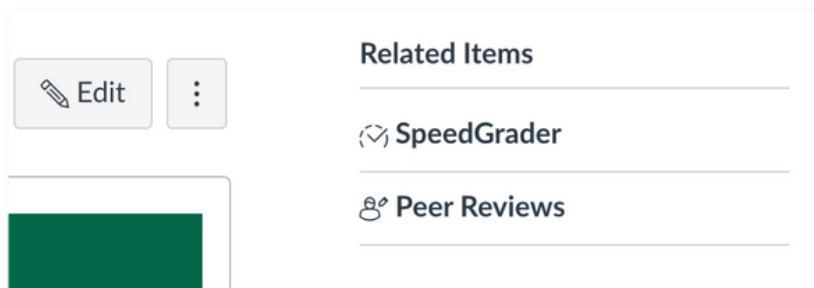

3 If you select the "Peer Reviews Appear Anonymously" option, students will be able to see the feedback by their reviewer(s) but will not be able to see the names of the peers who provided reviews on their work.
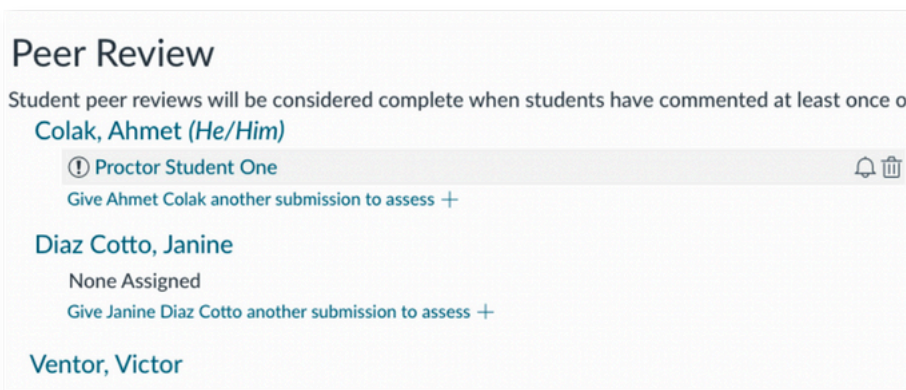

Anonymity

☐ Peer Reviews Appear Anonymously

4 Once you save your changes to the assignment, you will see the **Peer Reviews** option on the right top side of the page.
