Presentation: Tree Mapping

Maxine Haspel presented on the status on the Tree Mapping project. Due to some challenges such as the dense growth, COVID-19, and data transformation, the projected timeline has been extended to the beginning of May 2023. In order to map trees in dense sections, the team changed their approach and will use LiDAR data analysis for tree location and heights. In order to complete the project, the team requested an additional \$250. Additional funding was awarded, since the amount was less than 10% of the total award.

Meeting adjourned at 2:20 pm.
